**A warm welcome to HAKRO,**

**You're into high-quality, sustainable corporate wear, made with passion and attention to detail? Then do we have good news for you!**

**The HAKRO 2025 Collection is the most varied since our company was founded in 1969. Three new lines of trousers and, for the first time, exclusive HAKRO sneakers give you more freedom than ever to dress your team from head to toe in HAKRO outfits.**

**The names of our collections say it all: Work Performance, Corporate Essentials and Active Function make it easy to find the HAKRO items you are looking for.**

**We wish you lots of fun browsing our catalogue!**

NEW VARIETY

HAKRO

**More 'us' feeling: perhaps the best reason for high-quality corporate wear from HAKRO.**

**SUITS YOU.  
AND YOUR  
TEAM SPIRIT.**

Team spirit is when everyone pulls together with enthusiasm. It is the foundation for success and happy employees. The best way to promote that 'us' feeling and show it to the world comes in 38 vibrant colours, is very comfortable, functional and sustainably produced. Your employees will love it – as will your customers. This is corporate clothing from HAKRO.

^

**Less ego. More us.**

Corporate outfits strengthen  
team spirit and build bridges.

#### WHAT REALLY MATTERS?

When it comes to a successful investment in corporate wear, there are three aspects that really matter:

- › **QUALITY:** The clothes have to fit well, feel good, and still look new even after countless working days and wash cycles.
- › **SUSTAINABILITY:** Sustainable production matters to your employees as well.
- › **VARIETY:** Whether it's durable workwear or smart business outfits, it has to match your company and the job profiles of your teams. What you need is a varied collection.

#### First impressions matter – even in video calls when working from home.

It happens in the blink of an eye: people size others up and form a conscious, or even unconscious opinion, about them. High-quality clothing, tailored to your company, is a sign of professionalism and trustworthiness. Even on camera when you are working from home.

#### Often undervalued: support and recognition in the workplace.

Functional and high-quality corporate wear, optimised to meet special requirements, provides wearers with the support they need for their work. Whether it's workwear for the shop floor, office attire or functional clothing for all weathers. High-quality teamwear also strengthens employees' identity with their employer and gives them a sense of recognition.

# 168

models offer the perfect solution for every need.

#### Wearer acceptance: the key to that 'us' feeling and to motivation.

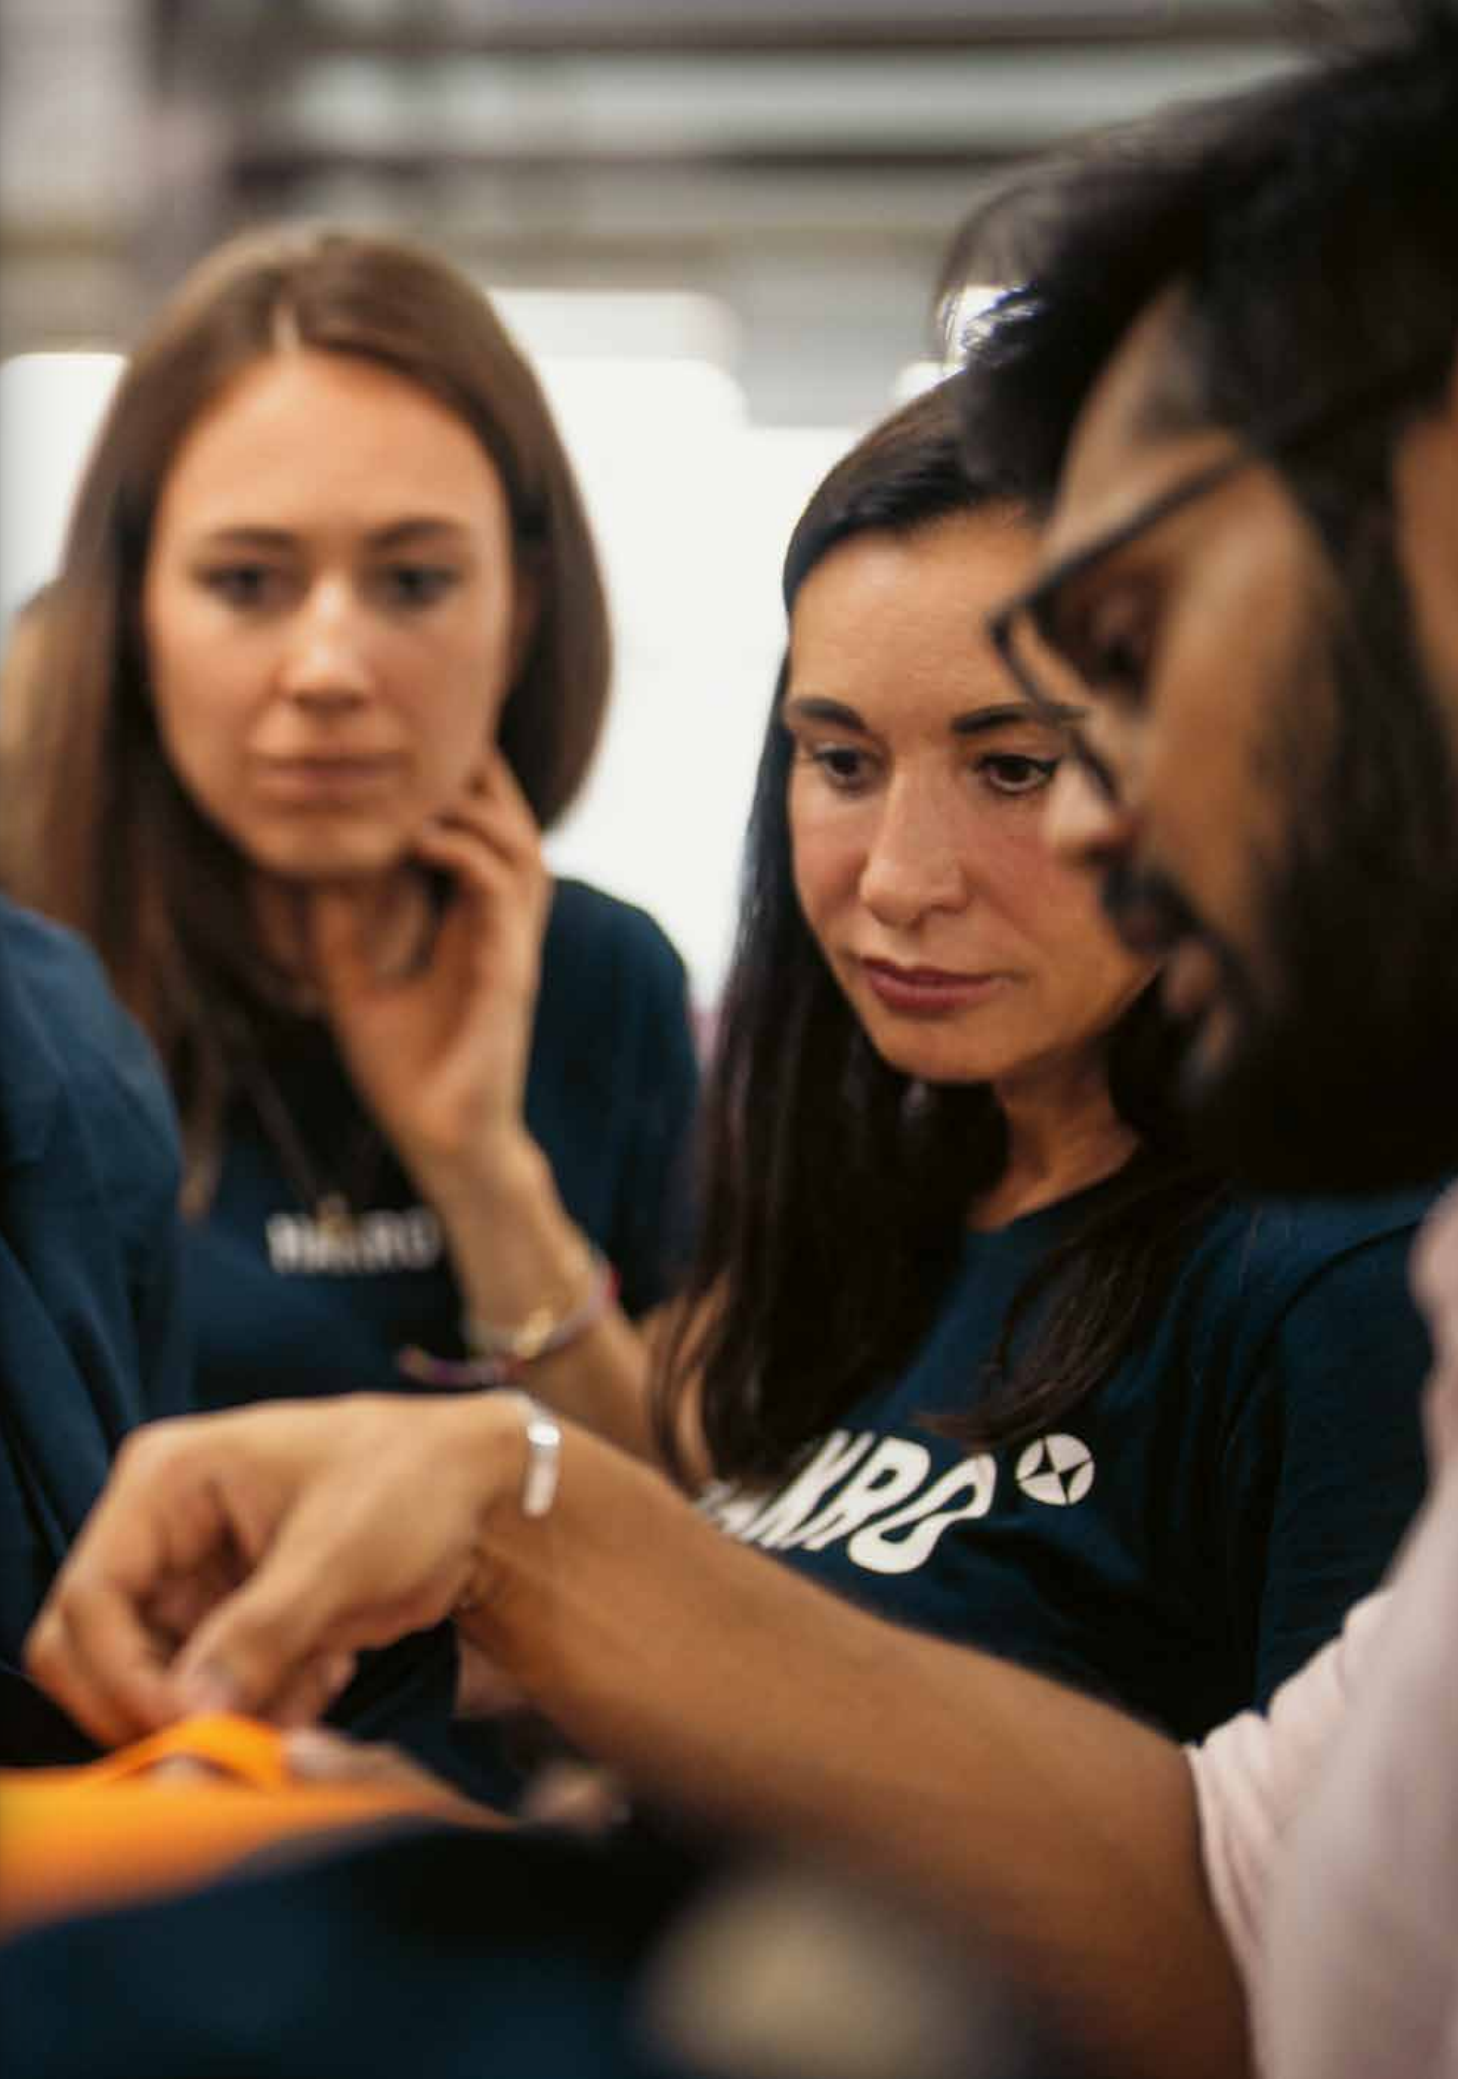

What you can achieve with workwear for your employees depends entirely on wearer acceptance. If they don't like wearing it, you'll achieve very little – or even the opposite of what you want. Look, feel, fit, sustainability, comfort and functionality. They all have a role to play.

A woman with brown hair and black-rimmed glasses is looking down at her work. She is wearing a dark blue long-sleeved shirt with the word 'HAKRO' in white capital letters on the right chest. She is also wearing several colorful beaded bracelets on her left wrist. The background is blurred, showing what appears to be a workshop or factory setting. The text 'BECAUSE EVERY DETAIL MATTERS.' is overlaid in large white capital letters on the left side of the image.

BECAUSE  
EVERY DETAIL  
MATTERS.

HAKRO

Quality at HAKRO:

# PASSION IS WHAT GUIDES US.

^

A **wealth** of ideas, fantastic teamwork, tests, even more tests and meticulous inspections have been invested in this material.

**HAKRO lasts. The proof is in every fibre, every colour and every single detail of our textiles. Together, they make the difference we are so passionate about.**

Our clothing embarks on a journey of quality, starting with the raw materials. With cotton, for example, the length of the fibres is crucial. HAKRO uses long-staple cotton, making our material especially durable, with a smooth surface for a high-quality finish.

**027 orange**

Shown here as a fabric from which the most vibrant and eye-catching T-shirts are made.

# 38

wonderful colours with maximum colour fidelity.

## Top-calibre materials.

We manufacture the best fabrics for our high-quality corporate wear. When the materials available just aren't good enough, we develop them ourselves, such as MIKRALINAR® and MIKRALINAR® ECO, TRIACTIVE and HAKRO COTTON TEC®.

## Seams, buttons, zips.

We use 20 types of seams, only use tear-resistant brand-name thread and sew with significantly more stitches than usual. Our buttons are made of unbreakable polyester and are securely lockstitched. We only use high-quality snap buttons, eyelets and zips from YKK®.

## The HAKRO colour promise.

The wide variety and unmistakable vibrancy of our colours is one of our obvious strengths. As is their fidelity across all our models and delivery batches. Even if you have to replace an article years later, you'll get exactly the same hue. What's more, our colours will last through countless working days and wash cycles without fading.

## HAKRO TRUE COLOURS.

Our HAKRO TRUE COLOURS colour technology is the foundation of our colour promise. Our in-house developed colour formulations, tailored for each fabric, are just as important as our strict controls of our very tight colour tolerances. The final step is an incoming inspection using our colour spectrometer and the highly trained eyes of our quality assurance team.

**There's no substitute for certainty.** We use trained staff and modern technology to inspect our colours.

v

A photograph of a woman wearing a bright blue headscarf with red beads, hugging a person from behind. The person being hugged is wearing a dark blue t-shirt. The woman has a gentle smile and is looking down at the person. The background is slightly blurred, showing an indoor setting with a ceiling fan. The overall mood is warm and intimate.

FOR THE  
MOMENT.

GOOD TO KNOW

An integrated sustainable business strategy:

# PUTTING INTENTIONS INTO PRACTICE.

**Sustainability is our path. Out of conviction.  
And because the global environmental and social  
challenges can only be met if businesses take  
responsibility.**

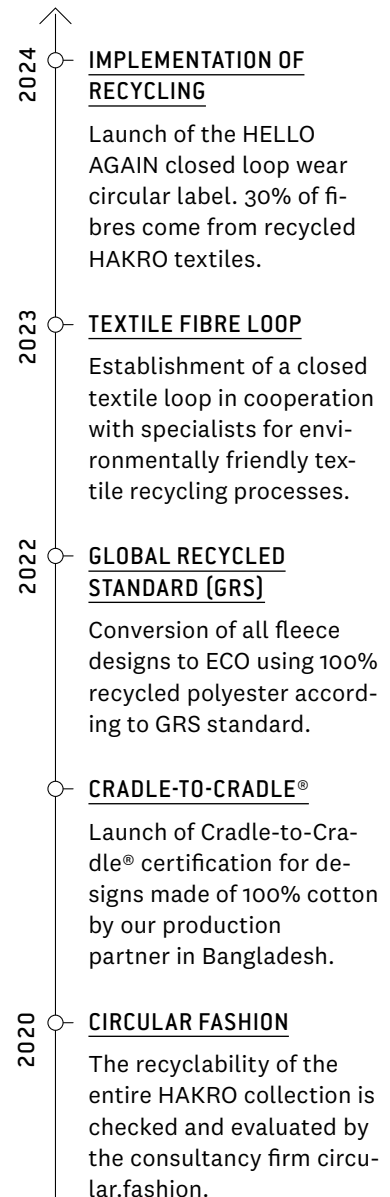

In our many years of working on sustainability in the textile industry, we have recognised that, if real progress is to be made, sustainability cannot be just one focus among many. This is what led to the birth of our integrated sustainable business strategy, which translates our values into concrete goals and measures across all our divisions. As an independent family business with no shareholders to answer to, we are free to act on our convictions alone.

Fair Wear is committed to the idea that responsible manufacturing of clothing is possible.  
So are we – which is why we joined the initiative in 2021.

## HAKRO IS A FAIR WEAR LEADER.

Fair Wear is an international multi-stakeholder initiative that sets social standards for the textile industry. As a member of Fair Wear, we adhere to a strict code of conduct that we systematically implement with our production partners. Achieving 'Leader' status in 2024 has reinforced our commitment to this path and inspires us to become even better.

**Milestones on the way to a circular economy**

\*HELLO  
AGAIN  
closed loop wear

## FROM T-SHIRTS TO RE-SHIRTS.

Used HAKRO corporate wear is collected from businesses, laundries and leasing companies, recycled purely mechanically without chemical substances and spun into new yarns. Under the HELLO AGAIN closed loop wear label, these are used to create leisure basics and give fabrics a second life. The first HAKRO second-life textiles are being supplied to companies that have returned used HAKRO corporate wear to the textile loop.

# 54

tonnes of used textiles were returned to the fibre loop by our retail partners and us in the first year.

### STRATEGY AND PRACTICE

These are the integrated sustainability targets we are currently pursuing as part of a circular economy:

- › Sustainable material and product development, including expansion of a closed loop.
- › Innovation management through co-creation with involved groups.
- › Inclusion of our retail partners in sustainability activities.

Download our Integrated Sustainable Management Report 2024 here.

NEW VARIETY

HAKRO

>

**Personalise**

your clothes, from the  
hood down to the soles of  
your shoes.

Variety at HAKRO:

# WHAT YOUR HEART DESIRES. AND YOUR MIND.

Are you looking for employee apparel to fulfill your special requirements? A warm welcome to HAKRO! The wide variety of our collections offers the perfect outfits for every need. For every job. In every size. In many vibrant colours. From head to toe.

**Embroidery finishing**  
Embroidery is the most elegant and durable form of garment finishing.

**Print finishing**  
Screen printing, thermal transfer and digital printing are the most common forms of garment finishing.

### **Our garments are your stage.**

Your corporate wear should carry your logo and help promote your company name. It should work perfectly every time and project a good impression of your company, so we've optimised all our fabrics for finishing. For example, by using high-quality fibres, very smooth surfaces are made possible.

**Jürgen Pruy**  
Head of Sales & Partnerships

In 2025, our range is more varied than ever before, from head to toe.

— Jürgen Pruy

Jürgen Pruy talks about the HAKRO portfolio, authorised retailers, the Schrozberg logistics centre and custom-made production.

**Jürgen, HAKRO is well known for its wide range of workwear designed to meet various needs. Given the large selection, how can customers find the solution that works best for them?**

Jürgen Pruy: Our portfolio is organised by key use cases. Our Work Performance, Corporate Essentials and Active Function collections provide a quick overview.

Authorised HAKRO retailers are there to offer you knowledgeable and personal advice. Working together with you, they find the clothing solution that perfectly suits your individual needs. They arrange fittings, manage garment finishing and organise logistics.

**Why did HAKRO decide to invest in a large, modern NOS warehouse? What does NOS actually mean?**

Jürgen Pruy: What good is even the best-laid plan to outfit your team if the garments are not available to reorder when you need them? NOS stands for 'never out of stock' – at HAKRO that means we have more than six million textiles in stock. This lets us get orders on their way, in most cases, within a single day. Whether you order one article or a thousand.

Our Private Label experts are there to help you make your individual teamwear design a reality.

### Another question: What does HAKRO Private Label mean?

Jürgen Pruy: Under the HAKRO Private Label, we customise existing articles to suit our customers' individual needs as much as possible. In terms of design, materials, colours, fits and sizes, we can make virtually any request a reality, without compromising on quality or sustainability.

# 385

thousand packages comprising  
240,000 orders were shipped in 2024.

**Six million textiles in stock:** when it comes to corporate wear, especially reorders, availability is key.

# LEGROOM FOR A WHOLE NEW OUTFIT.

**Jeans aren't what they used to be. Thankfully!** Ozone washing, which has replaced chlorine bleaching, is just one aspect of the way our denim collection makes a sustainable difference.

**The world needs new trousers: with the best of fabrics, a perfect fit and smart details for every application. And because our new trouser lines are so varied, they give you all the ‘legroom’ in the world to create your own outfits.**

# NOW YOUR TEAM IS WEARING THE TROUSERS.

The new HAKRO trousers, with their 48 legs, have both feet on the ground in the lives of tradespersons and office workers. On the construction site or in meetings, indoors or outdoors, long, short or skort, there is an ideal solution for every need and every team.

GOOD TO KNOW

**SMALLER THAN YOU  
WOULD THINK.  
IN CARBON FOOTPRINT.**

**HAKRO SNEAKERS ECO VEGAN** are completely free from animal-based materials. The outer material is made from robust apple skin. The sneakers are made in Portugal. But don't worry, you can simply go to page 259 to order.

#### **Upper material**

Apple skin: a material made from dried apple waste mixed with polyurethane on a tear-resistant cotton/polyester backing. It is sustainable, durable and weather-resistant.

#### **Laces**

Organic cotton, certified according to the Global Organic Textile Standard, creates a sustainable tie between the wearer and the shoe.

#### **Outsole**

Good support, good grip and, thanks to its high percentage of recycled rubber, the outsole is no slip-up in terms of sustainability either!

#### **Insole**

Impressive on the inside too: removable PU foam insoles made from recycled plastics.

**YOUR BEST  
FOOT  
FORWARD.**

Create your own HAKRO sneakers. With HAKRO Private Label, there are lots of ways to customise your look: from printed logos and embossed tongues to colourful laces and exclusive outer material colours. You can even customise the seams, outsoles and insoles.

## Properties

Extremely durable,  
abrasion- and tear-resistant

Suitable for industrial  
laundering according to  
DIN EN ISO 15797

Maximum colourfastness  
and shape retention

Breathable and fast-drying

Pleasant on the skin,  
comfortable to wear

**WORK PERFORMANCE** is our collection for those who rely on maximum stability combined with a very comfortable fit in their day-to-day working life. All **MIKRALINAR®** models and all Performance trousers are suitable for industrial laundering.

### LEASING-READY

HAKRO models for industrial laundering are extremely robust, colourfast and require little energy to dry – from tops to trousers. Leasing collars and hanging loops perfectly complete the all-round worry-free package.

## MIKRALINAR®

It's no coincidence that MIKRALINAR® has been at the top of the HAKRO bestseller list for years: the self-developed material combines the high wearing comfort of long-staple cotton with the special abrasion- and tear-resistance of a special high-tech polyester. With the exception of blouses and shirts, all our textiles made from MIKRALINAR® are suitable for industrial laundering in accordance with DIN EN ISO 15797.

## MIKRALINAR® ECO

MIKRALINAR® ECO impresses with the same properties as HAKRO classic MIKRALINAR®, including unrestricted suitability for leasing. When it comes to sustainability, however, the ECO line goes one step further. Only recycled polyester fibres, certified in accordance with the Global Recycled Standard (GRS), are used here. This means that MIKRALINAR® ECO has also earned the government's Green Button certification.

MIKRALINAR®

# CORPORATE ESSENTIALS

CORPORATE ESSENTIALS

# STRONG OUTFITS FOR HOME AND WORK.

## Properties

Very comfortable, stretchy material blend with high cotton content

Many models certified according to the Global Organic Textile Standard (GOTS)

Can be combined in a variety of ways for a wide range of uses

Easy-care and durable even after many washes

**CORPORATE ESSENTIALS** is our collection offering basics for everyday working life. The textiles made from natural fibres are perfect for classic and business-casual looks or for merchandising purposes.

### GOTS FOR KIDS

Many Corporate Essentials models are made from organic cotton, certified in accordance with the Global Organic Textile Standard (GOTS). In our Kids' line, every model is made without exception from this certified organic cotton.

## BUSINESS LOOK

The HAKRO business look is timelessly elegant clothing for a professional appearance at work or when working from home, during field work or at trade fairs. Our stylish shirts, blouses and fine knitwear models are characterised by premium materials, perfect fits and high wearing comfort.

## CIRCULAR ECONOMY

21 of our T-shirt, polo shirt and sweatshirt models made from GOTS-certified organic cotton and conventional cotton (supporting the CmiA initiative) have achieved Cradle to Cradle Certified® bronze certification. Behind this is the Cradle to Cradle Products Innovation Institute (C2CPii), a non-profit organisation that promotes the circular economy and the safety of products.

## ORGANIC COTTON

HAKRO uses organic cotton that is certified in accordance with the Global Organic Textile Standard (GOTS). It comes from environmentally friendly cultivation without the use of synthetic fertilisers and pesticides.

# ACTIVE FUNCTION

ACTIVE FUNCTION

# INSIDE & OUTSIDE. BENEATH & ON TOP.

## Properties

High-performance functional fibres from leading brands

Maximum breathability, temperature-regulating and fast-drying

Ideal for combining with other HAKRO textiles

Vibrant, brilliant colours

**ACTIVE FUNCTION** is our collection for those who want to adapt their clothing flexibly to different conditions. With high-end functional fibres and clever details, our models ensure ideal comfort in any weather.

### LAYERED PROTECTION

You can maximise the potential of functional clothing by using several layers. The first layer is thin and fitted to the body. The middle layer can keep you warm or cool. If necessary, a third layer protects against wind and weather.

## HAKRO COTTON TEC®

An innovative double-face material that combines our high-quality cotton with the high-performance TRIACTIVE fibre. This structure enables effective temperature regulation by quickly wicking moisture to the fabric's surface where it can evaporate. The material dries quickly and prevents odour formation, making it the ideal fabric for sweat-inducing activities.

## COOLMAX® PRO

The most powerful COOLMAX® high-tech fibre. It optimises the regulation of body heat through its special 4- or 6-channel fibres. These fibres wick moisture directly to the fabric's surface for evaporation, ensuring that the garment feels dry at all times. COOLMAX® PRO is used in demanding environments where top moisture regulation and high wearing comfort are required.

## TRIACTIVE

High-quality functional yarn that has been specially developed to effectively wick moisture to the fabric's surface using multi-channel technology, where it evaporates quickly. The textiles are breathable and very comfortable to wear, even during intense physical activity.

## TRIACTIVE PRO

Combines waterproof and wind-proof properties with outstanding breathability. This is ensured by special membranes that keep water and wind out, while allowing moisture to escape from the inside. The material is ideal for applications where weather resistance and good air circulation are important.

**GOOD  
TO KNOW.**

# SITS, FITS AND BRINGS JOY.

We make clothing for the wide variety of people and their professions, not just for runway models. That's why we've spent time studying different body types and perfecting our cuts and sizes, so our clothing fits well, looks great, and leaves a lasting impression.

## FIT STYLES

### Body Fit

The right fit to accentuate your figure.

### Regular Fit

Many consider this to be the happy medium: not too tight, not too loose.

### Comfort Fit

A comfortably loose fit with lots of freedom of movement.

International sizes	35	36	37	38	39	40	41	42	43	44	45	46
Size (cm)	24.5	25	26	26.5	27	28	28.5	29	30	30.5	31	32

<sup>1</sup> All measurements and sizes are subject to change. Improvements in cut may result in minor dimensional variations. We recommend trying on articles at a HAKRO retailer.

<sup>2</sup> **Collar size.** This is an additional shirt measurement. To determine your collar size, wrap a measuring tape around your neck just below the larynx. Carefully, of course!

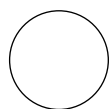

<sup>3</sup> **Kids.** Every child is unique. The ages indicated are therefore only meant as a rough estimation. Children's sizes are given as the height in centimetres.

# LOYAL. RELIABLE. COLOURFUL VARIETY.

HAKRO is recognised for its wide selection of vibrant colours. Thanks to our high-tech TRUE COLOURS dye technology, our extensive textile range can endure countless washes and strong light exposure. This advanced technology also guarantees the unique level of colour consistency across all models and delivery batches.

# MEMBERSHIPS AND STANDARDS

High-quality products and responsible, sustainable production that meet high social standards are among our unwavering core values. This is reflected in our many certificates, seals of approval and voluntary commitments, the criteria for which often go far beyond the legal requirements.

## FAIR WEAR

We have been a member of Fair Wear since 2021. The international multi-stakeholder initiative monitors working conditions and social justice in the factories of textile companies. The annual Brand Performance Check helps us to objectively assess what is going well and where there is room for improvement. In 2024, we achieved 'LEADER' status. This tells us that we are on the right track!

# TEXTILE LEXICON

Harry and Marianne Kroll (fourth and first from the left) in 1969 with employees in front of the Harry Kroll clothes store in Schrozberg.

## 1969

Neil Armstrong lands on the moon. Marianne and Harry Kroll have no time for the moon; they prefer to reach for textile stars and open a clothing store in Schrozberg. It is the cradle of today's HAKRO GmbH and therefore more significant to us than the moon landing. And let's be honest, our clothes are a lot more comfortable than a spacesuit.

## ANTI-PILLING FINISH

A finish that helps prevent the formation of tiny fibre balls (pills) on the surface of the fabric.

## APPLE SKIN

Apple skin is a vegan leather alternative made from production waste from the apple industry. Dried and pulverised apple residues are mixed with polyurethane (PU) and applied to a tear-resistant textile backing made from a cotton/polyester mix. The fabric is then heated, transforming it into a durable, weatherproof material.

## BIO-CIRCULAR DYNEEMA®

Dyneema® is a brand name for a high-strength polyethylene fibre. The material's very long chain of molecules gives it properties that include high tensile strength at low weight, low water absorption, high abrasion resistance and UV resistance. Bio-Circular Dyneema® has an improved carbon footprint through the use of renewable raw materials from the wood and cellulose industries.

## COOLMAX® PRO

High-tech functional material from The LYCRA Company, with special four and six-channel fibres that quickly wick moisture to the fabric's surface, where it evaporates.

## CORDURA®

CORDURA® is an extremely durable material made of high-strength nylon fibres. It is known for its excellent abrasion, tear and wear resistance properties. CORDURA® is water repellent and lightweight for added protection and comfort.

## DOUBLE-FACE MATERIAL

A fabric made from two different materials which form the inner side and outer side. Double-face materials can be glued or woven together. Also see "HAKRO COTTON TEC®"

## ELASTOLEFIN

An elastic, synthetically produced fibre that can be washed and tumble-dried at much higher temperatures than other elastane fibres without losing elasticity or damaging the fibres. HAKRO uses elastolefin in the trousers from the Performance collection, as these are specially designed for industrial washing.

## FLEECE

Fleece is a knitted fabric that is textured on one or both sides and is usually made of 100% polyester. Fleece is extremely lightweight, warming, windproof, elastic and very comfortable to wear. Microfleece is an especially light and high-quality version of fleece. Microfleece textiles from HAKRO are very easy to keep clean and feature an additional anti-pilling finish. See also “Anti-pilling finish”.

## FULLY FASHIONED

A manufacturing method for knitted articles that doesn't require any cutting. The components are knitted into shape and only a few single seams are necessary to complete the article.

## HACCP

Acronym for “Hazard Analysis and Critical Control Points”, which is a systematic approach to ensuring food safety. HACCP-compliant clothing for employees who come into contact with food is a key component of this hygienic concept.

## HAKRO COTTON TEC®

A double-face knitted fabric made by combining two threads with different functions: extra-fine cotton single jersey on the outer side and a mesh layer made of the functional fibre TRIACTIVE on the inner side. Moisture is quickly wicked to the fabric's surface, where it evaporates. This gives the textile temperature-regulating properties.

## HAKRO X-STRETCH

HAKRO X-Stretch is a highly elastic four-way stretch material used in many of our trousers. It fits perfectly to your body, offering maximum freedom of movement and comfort at the same time.

## INDUSTRIAL WASHING

Workwear is often cleaned in industrial laundries, where it is subjected to greater stresses (mechanical, thermal and chemical) than in a home wash cycle. DIN EN ISO 15797, which is often cited on this subject, is a test standard that determines the suitability of articles for industrial washing.

## INTERLOCK

A flexible, double-faced knitted fabric that has knit stitches on each side so that both sides look the same. Interlock fleece has a soft-textured side to provide thermal insulation.

## KNITTED FABRIC

This kind of fabric is made by looping together one or more threads to form a single textile. Compared to weave fabrics, knitted fabrics are generally more elastic and less prone to creasing. HAKRO uses a range of knitted fabrics, such as single jersey, piqué, jacquard, fine knit, (French terry) sweatshirt material and mesh.

## LAMINATE

Laminates are textiles made by bonding or melting onto a second layer. HAKRO frequently uses multilayer laminates in its waistcoats and jackets. Jackets made with two-layer laminates have a loose lining in the back to prevent direct contact with the membrane. With 2.5-layer laminates, the membrane is protected by adding another coating. Instead of this coating, three-layer laminates use another layer of fabric, such as microfleece or mesh, on the membrane. Multilayer laminates are up to 100% waterproof when the seams are taped after manufacturing. Multilayer laminates without this additional seal are only water repellent.

## LOCKSTITCH TECHNIQUE

A technique used to sew on buttons more durably by securing (“locking”) not just the button but also the end of the stitch.

## LYCRA®

This protected brand name stands for an extra high-quality elastane from The LYCRA Company. LYCRA® is highly flexible and has excellent shape-retaining properties.

## MEMBRANES IN TEXTILES

A membrane is a special layer that is bonded firmly to the back of an outer material. Membranes increase the breathability of functional wear, making them more comfortable to wear. They also offer protection against environmental moisture while letting water vapour escape. Compared to coatings, membranes are robust, abrasion-resistant and thus more durable. Breathability is only a factor when there is a difference in temperature between the inside of an article and the outside. HAKRO uses membranes in products labelled TRIACTIVE PRO.

## MERINO WOOL

The merino wool used by HAKRO is an extra-fine, non-scratch animal fibre that is soft to the touch. It has an even mesh, is pleasant to wear and can be washed at 30°C.

## MIKRALINAR®

This skin-friendly functional mix was developed especially for HAKRO and combines the advantages of cotton with the strengths of a special high-performance polyester. Materials made with MIKRALINAR® are suitable for industrial washing and leasing, highly durable, shape retentive and tear resistant.

## MIKRALINAR® ECO

MIKRALINAR® ECO is the sustainable advanced version of MIKRALINAR®. It is made with recycled polyester according to the Global Recycled Standard (GRS). Despite being soft to the touch, it is also robust and suitable for industrial laundering.

## NYLON

Generic term for polyamide 6.6, which has a higher elongation at break, lower tensile strength, higher melting point and lower moisture absorption than polyamide 6.

## OZONE WASHING

When producing its jeans, HAKRO uses ozone washing as an environmentally friendly alternative to common methods. Ozone does not emit any pollutants, since it turns into oxygen in the atmosphere. This method also uses significantly less water.

## PIMA COTTON

An extra high-quality cotton with long, fine fibres. Textiles made of Pima cotton have a flat surface and are full to the touch and exceptionally soft.

## PIQUÉ

A knitted fabric with a honeycomb or grainy structure that is traditionally used in polo shirts.

## POLYESTER

Given the wide range of these synthetic fibres, there is a suitable product for every need. Polyesters have a wide range of properties, which affect the functionality, moisture wicking properties, tear and abrasion resistance and comfort of the article they are used to make. HAKRO uses recycled polyester, including recycled polyester certified by Global Organic Standard, in many of its products. In addition, we use recycled polyester from renowned manufacturer REPVE® in our trousers. Models with this polyester include “ECO” in the product name.

## PRE-SHRINKING

Pre-shrinking is a form of mechanical/thermal textile treatment which guarantees that the treated textiles will only shrink slightly and within specified tolerances when washed.

## REPVE®

A sustainable brand for recycled polyester fibres made from plastic bottles and industrial waste. By using fewer new oil-based raw materials, REPVE® reduces energy and water consumption. Despite their recycled origin, REPVE® fibres boast high quality, durability and comfort.

## RET VALUE

A textile's resistance of evaporation (RET) value indicates how permeable it is to water vapour. The value reflects the force that water vapour requires to pass through the textile.

## RIPSTOP

A highly tear-resistant fabric woven together using a special technique. Thicker fibres are woven into the fine material at intervals. This makes ripstop a stable and tear-resistant material.

## SINGLE JERSEY

A finely woven, flexible knitted fabric used in outer clothing.

## SOFTSHELL

At HAKRO, we use the term “softshell” to denote the combination of the outer and middle layer in a single product. See also “Laminates”. The material is smooth, wind, and waterproof on the outer side. On the inner side, it has a soft surface and is pleasant to wear. Soft-shell jackets are elastic and suitable for workwear due to their high freedom of movement.

## STAPLE LENGTH

The length of fibres. The longer the fibres, the higher the quality of the fabric. For cotton in particular, staple length is a key sourcing criterion. HAKRO uses long-staple, combed, ring-spun cotton.

## STRETCH

Fabrics that have a proportion of elastane are more flexible, making them more comfortable to wear and increasing freedom of movement. Elastane is a synthetic fibre. See also “HAKRO X-STRETCH”.

## SURFACE WEIGHT

The weight of a fabric in grams per square meter. It is a general indicator of textile quality. But heavy fabrics are not always better. The high durability of our fabrics allows us to reduce the surface weight of some textiles to improve comfort without compromising on quality.

## SWEAT MATERIAL

A single-layer, usually circular-knit fabric that also features a soft lining thread concealed in the front by a cover thread. Finished articles have only knit stitches on one side. On the reverse, either purl stitches or the lining thread can be seen, or it is heavily roughened. Clothing made with roughened sweat material tends to form lint on the inner side, but this stops after the first few wash cycles. French terry sweat materials are not roughened on the reverse side.

## TRIACTIVE

A high-quality functional thread that quickly wicks moisture to the fabric’s surface thanks to its unique multichannel design.

## TRIACTIVE PRO

Fabrics that have a membrane that makes them waterproof, windproof and permeable to water vapour. HAKRO uses TRIACTIVE PRO in all products that require good breathability or water permeability and resistance.

## WATER COLUMN

A measurement unit denoting a fabric’s waterproofness. The water column indicates how much water an outer material can withstand before it lets moisture through. A water column of one metre is the equivalent of approximately 0.098 bar. Clothing with a water column of 1,300 mm or more can be called waterproof.

## WEAVE FABRICS

Some fabrics are made by weaving together two groups of threads (warp and weft) at right angles. HAKRO uses different types of weave fabrics: poplin, satin and twill. Weave fabrics have a simple warp and weft pattern and are light and flexible. Double weaves are made from two layers of fabric. They are thicker, stronger, warmer and better suited for heavy-duty use.

## WINDPROOFNESS

Windproof textiles prevent the wearer from cooling down too quickly. The higher the wind speed, the colder it feels (chill factor). For example, an outside temperature of  $-1^{\circ}\text{C}$  feels like  $-21^{\circ}\text{C}$  at winds of 64 km/h. Windproof textiles significantly reduce the chill factor.

## YARN

A heavy thread comprising two or more threads twisted together, often used in clothing. Yarns have high tensile strength, giving the seams high durability. HAKRO only uses quality yarns from renowned brand manufacturers.

# LONG-LASTING. SUSTAINABLE. VERSATILE.

## QUALITY

### RAW MATERIALS

Long-staple, ring-spun, and combed cotton

Renowned functional fibres from leading manufacturers

Optimised proprietary fabrics with ideal surface weight

Smooth surfaces with ideal properties for finishing

### HAKRO TRUE COLOURS SYSTEM FOR COLOUR MANAGEMENT

HAKRO colour formulations, optimised for various materials

Colour consistency across models, fabrics and delivery batches

Colourfast, even in industrial washing for many models

Technical and visual colour checks at all stages of the process

### MANUFACTURING

Flexible, sturdy seams in 20 stitch variants with high stitch density

Break-resistant buttons, securely sewn using the lockstitch method

Premium zips and eyelets from the specialist YKK®

Certified quality management system covering all production processes

### COMFORT

Fits and sizes that sit well

Freedom of movement and shape retention

Breathable and quick-drying

Feels good and comfortable to wear

## RESPONSIBILITY

### PEOPLE AND ENVIRONMENT

Integrated sustainable business strategy

Highest social standards from raw material to finished textile

Ongoing commitment to reducing harmful substances in all areas

Innovative management for continuous improvement

### CIRCULAR ECONOMY

Return of worn HAKRO workwear

Chemical-free mechanical fibre recovery

Production of yarn with 30% recycled HAKRO textile materials

HAKRO 2nd-Life-Label: Leisurewear under the HELLO AGAIN closed loop wear brand

## VARIETY

### COLLECTIONS

Work Performance

Corporate Essentials

Active Function

Sneakers & Accessories

### PRODUCT RANGE AND VARIETY

168 models for complete outfits from head to toe

3 fit styles and 16 sizes from 110/116 to 6XL

38 colours with consistently reliable shades
